

Kebu

INSTRUMENTAL VINTAGE SYNTHESIZER MUSIC
PROMOTIONAL MATERIAL 2012

Kebu is a keyboard wizard who creates new instrumental synthesizer music influenced by the melodic kind that was made in the 70's and 80's.

He has attracted a lot of appraisal and attention for his YouTube channel containing videos of his own compositions performed with his vintage synthesizers. The channel was set up in May 2010 and has already attracted over 100,000 viewers:

Kebu is currently working on his debut album as a solo artist. The album will consist solely of music made using vintage analog synthesizers, which is recorded and mixed in the traditional way using only tape machines and analog mixers. The album will be released in Spring 2012.

In Summer 2012 a tour in Sweden and Finland will be arranged to support the release of his album. The show will consist of Kebu performing his music live on his impressing arsenal of vintage analog synthesizers. Kebu has material for giving a full (2 x 45 min) performance.

Kebu is no newbie to the game. He has performed in over 100 gigs and has a large discography as a keyboard player, arranger, composer and engineer with bands such as Kouzin Bedlam, Vinyl Jam, 1G3B, So Long Sisters, Prime Mover, Fat Funk Force, Nektor, and Couch.
